ROADMAP

MEET THE FOUNDERS

- John K. Marcos
- Gareth James

WHAT IS DEFVERSE?

DEFVERSE – the universe as we know it.

Worlds within the DEFVERSE are separated by lore. Each world containing its own unique identity and race specific games. Games from a variety of genres will be hosted within each world which use the same set of lore.

EXAMPLE

The Nekonians of the Neko Sekai are a cat like race, and the games created within the world of Neko Sekai, are focused with this specific race (or possibly set of races) in mind. Nations such as ‘The Atropaxians’ (Hell Cats), ‘The Sons of Khover’ (Draconic Cats), and ‘The Host of Angels’ (Holy Cats) exist as factional entities within that world.

Upon launching the platform, you will be presented with a map of ‘The DEFVERSE’ which will list all available worlds including those currently in development. You will be able to interact with the worlds, read lore specific documents, and manage world specific NFTs from within its interface.

WHAT MAKES US DIFFERENT?

DEFVERSE aims to be the first company to offer a platform where NFTs from one game, can be utilised within other games within their own universe. The value in the ability to use NFTs outside of a singular game, encourages investors to try all games on the platform and not just a single title. NFTs will retain value (or gain it) because the utility of it does not just depend on the success or interest of a single title. Future games will incorporate the use of NFTs developed for other titles to offer exclusive rewards such as in-game vanity assets (titles, borders, pets etc), boosts, buffs, and community raffles.

WHO ARE WE?

DEFVERSE is an NFT project originally founded by John K Marcos and Gareth James in 2022. The company goal is to develop quality game-related artwork with an emphasis on game-related utility and blockchain integration. Offering a platform for a library of NFT related games both developed in-house and by 3rd party developers, DEFVERSE aims to create a social hub for game enthusiasts to enjoy a variety of games, with the bonus of regular events and cash rewards including tournaments, a lottery system and more....

WHY GAMES?

Games have been a part of society dating back to 6000 BCE (before the current era), where it is suggested by historians that games like “knucklebones”; which use a die or several dice, were made from the talus bone (a bone in the foot) and used for entertainment and gambling.

Gaming has since developed from “throwing bones”, to what we have today, a wonderland of entertainment. Board games, arcade machines and personal entertainment systems.

The video game industry is the 4th largest entertainment industry in the world. Video games are also a huge part of how we interact socially and competitively.

WHY CRYPTO?

The NFT and crypto market took the world by storm in late 2015 when the world was introduced to the concept of digital ownership of non-tangible assets. They coined term “Non-Fungible Tokens”.

Shortly after, in 2016 the first ever NFT “Play-To-Earn” game was released. This quickly became hot topic across many communities and contributed to the BOOM in the awareness of cryptocurrency and it’s potential.

OUR MISSION AND VISION

HOW WE BEGAN

DEFVERSE is an NFT project that was originally founded by John K Marcos in early 2022. His vision of a platform to host his own NFT games, and those of other independent developers in a central social hub, is what initially sparked his interest in the project. Intrigued by the potential of the crypto markets shortly after the Bitcoin boom in late 2017, he later became attracted to the concept of NFTs and their functionality and collectorship. After studying the financial market and familiarising himself with blockchain technology he began to create the DEFVERSE project.

As a solo entrepreneur and gaming enthusiast he invested in his dream project and began to bring it to life creating his first game concept ‘Space Guardians’. Hiring a team of talented developers, he began creating the assets and codebase.

WHERE WE ARE

As of Q2 2022, we have finalised our first game and are in the beta stages of testing our platform and its capabilities. We have continually tested and adjusted our proof of concept to ensure the best success and stability for the project, and have developed a road map of our expected progress. This is outlined in detail in our pitch deck which can be found below.

PITCH DECK: <insert URL here>

WHERE WANT TO BE

DEFVERSE aims to be the first social platform where you can manage a multitude of NFTs from various projects on our platform. Our vision transcends merely hosting NFTs. One of our goals is to integrate a social hub within our platform where people can play, hangout, host, play games and trade your assets in one place.

DEFVERSE also hope to tackle the economic instabilities of the Play-To-Earn architecture which sees 99% of projects fail to maintain a stable token and aim to approach it a different way. We reward our players in the form exclusive community events, raffles, lotteries and more.

As we develop and solidify our core features, we later aim to implement a full e-sports tool kit too (among other things). We want to offer the ability for developers and communities to host tournaments of their own from within our platform.

THE ECONOMY

NFTs

DEFVERSE have developed a unique ecosystem that will help maintain market stability and assist with game balancing. We recognise the struggles and the importance of a balanced game which is commonly forgotten by many projects in favour of pay to win mechanics and expensive vanity shops to please investors and venture capitalists.

We are proud to announce that we are not affiliated with any venture capitalist or angel investor and can therefore focus purely on our market, our platform development, and the rewards systems we implement, to help give back more to our core investors, that is you, our NFT holders.

MINTING LIMITATIONS

Every 8 weeks we will release new editions of our core cards which will have unique names and art designs based on their race. We will release a MAXIMUM of 5,000 NFTs per edition and once this cap has been reached, the only way to FUSE your sets (to create a 4-star variant) would be to buy them from our marketplace or one of our secondary marketplace partners (TofuNFT), from other investors.

Many successful projects develop over time and the cost of the associated NFTs rise substantially, usually costing several hundreds of dollars for a single NFT. We aim to prevent that by keeping our base NFT cost at \$150 BUSD for all new edition releases. There will be no more than 5,000 NFT's released every 8 weeks (excluding founders editions / special editions).

PERISHABLE NFTs

A core element of the prize pool sustainability is the inclusion of perishable (limited use) NFTs. These NFTs will be used for a variety of functions including, but not limited to, in-game vanity objects / assets, unique titles, auras, banners, pets, lotteries and more.

The funds generated from these sales will be used to inject the prize pool, which will be used to fund tournament and other lottery rewards.

FUSION - NFT BURNING MECHANISM

Our **FUSION** feature is one of our burning mechanisms where owners of a 1-, 2-, and 3-star NFT of the same character, may **FUSE** them to create it's associated 4-STAR Legendary NFT. When fused, the 4-star card is generated with randomised stats and the fused cards will be burned and removed from the eco-system.

CROSS PLATFORM TRADING

We have partnered with the well-known Tofu NFT platform. Owners of our NFT can use this platform to trade their NFTs which will be an extremely useful feature when seeking to fill those card sets in preparation for fusion.

DEFVERSE LOTTERY

One reward mechanism for eligible investors is our weekly/monthly lottery draw.

- Entry to this lottery is automatic for every NFT holder

- There will be a validity period of **3 MONTHS** from the minting date where you will be eligible to enter all lottery draws using that NFT
- All eligible NFT holders will be chosen randomly, and the prize awarded will be dependent on the STAR level of your NFT (see the table below)

EXAMPLE

Assuming maximum prize pool for this giveaway is \$10,000, and only one winner will be chosen at random (this will vary depending on the giveaway / promotion):

CARD RARITY	REWARD MODIFIER	REWARD AMOUNT
1 STAR	20%	\$2,000
2 STAR	40%	\$4,000
3 STAR	60%	\$6,000
4 STAR	80%	\$8,000
5 STAR	100%	\$10,000

DEFVERSE MILLIONAIRE MAKER (PHP)

We want to make dreams come true, and what better way to do it than making some of our investors actual **MILLIONAIRES!** Amazing, right?

IMPORTANT NOTE: This is based on the Philippines PESO currency; the USD equivalent is around \$20,000.

Once every 90 days* we hope to make someone a millionaire by awarding a single investor a prize of **1 MILLION** “Yup, you read that right!”

1 MILLION PHILIPPINE PESOS

(approx. \$20,000 BUSD equivalent)

Eligibility criteria is as follows:

- Only **4 STAR Legendary** / **Founders Edition** cards are eligible for this raffle
- The card chosen as the winner MUST have raffle validity
 - **NO** banned accounts / blocked for cheating
 - Raffle eligibility is in date
 - **3 MONTHS** validity from the date of purchase (first mint date)
 - **3 MONTHS** validity from the date it was fused
 - **NOT SECOND HAND** (Can't be bought from market)
 - Card must be in the wallet when chosen
 - If card is traded during raffle period, the prize will be forfeited
 - **DO NOT** trade these cards before raffle winner is chosen

TOURNAMENTS

The tournament system will be one of the core rewards systems within DEFVERSE. Tournaments will be held weekly over various games on our platform with a variety of monetary and vanity rewards.

Players can also show off with special vanity titles and trophies displaying their competitive history and awards earned.

Tournament entry is available for ANY investor who owns an NFT related to the game hosting that tournament. For example, you cannot enter a tournament with a Space Guardians NFT for a game other than Space Guardians. Tournaments cycle between games every week (sometimes sooner than that).

Tournament registration will be activated via the in-game menu and will begin at the advertised time. Participants will be prompted to enter the tournament lobby where they will then be placed into a recorded session, and they will begin their challenge. Scores, game data and video/screenshots will be sent to the server for verification and anti-cheat checks, and upon validation, be recorded in the tournament charts.

The top 8 players from the tournament leader board will be placed into a “Single Elimination Tournament” where they will be randomly selected to play against each other 1 vs 1 through Quarter Finals, Semi Final and eventually The Grand Final. The winner will be crowned champion, but rewards may be staggered across the top ‘x’ number of positions.

EXAMPLE

500 people register for tournament. TOP 8 in leader board progress to play-offs. Reward pool of \$1000 BUSD. 8 prizes will be awarded as follows.

Prize Allocation

WINNER: 40%	\$400
RUNNER UP (2nd place): 20%	\$200
SEMI FINALISTS (3rd + 4th place): 10% each	\$200 (\$100 each)
QUARTER FINALISTS (5th- 8th place): 5% each	\$200 (\$50 each)

PLATFORM

SOCIAL HUB

Community is a huge part of any project and DEFVERSE realizes this. It is of paramount importance to us that we develop systems to handle many active players and the ability to host public lobbies and chat rooms for our players. Further functionality such as private rooms, voice chat and possible conferencing for guilds will be implemented later.

INDIE DEVELOPER INVITATION

The vision for the DEFVERSE project is to create a globally recognized platform where gaming enthusiasts and crypto investors can gather, invest, socialize, and play a variety of NFT related games. Although the project will initially start with a variety of small games designed to be mobile compatible, the goal of our project is to invite independent developers to host their own projects on our platform, and to be able to seamlessly integrate using our blockchain tools to monetize and manage their own project.

GAME MARKETPLACE

The game marketplace will host all NFT projects partnered with DEFVERSE. You will be able to buy NFTs specific to each title and retrieve information on the company, the project, and the strength of their token from within our app. You will be able to interact with the community specific to that project and trade their assets and currency.

You will have an overview of all NFTs available for each game on the DEFVERSE platform. You can view, manage, and trade independent developers NFTs directly from within our platform without the need to handle that transaction via third party sites.

ESPORTS INTEGRATION

As part of our roadmap, later in the development of DEFVERSE we will add a comprehensive list of tools specifically designed for ESPORTS integration. The ability to host your own tournaments, send winner data to a central server and offer validity checks, as well as anti-cheat scripts to validate player data and game submissions, will be offered. You can then display the winners directly to the game interface or via our website using a unique link specific to your tournament.

Further functionality will be added thereafter, such as the ability to nominate a host to be shout-caster, and a real-time video production coordinator to add that special touch to your event.

DECENTRALIZED APP

DEFVERSE has built a decentralized app which is used to BUY and FUSE your cards conveniently in one location. Our website hosts our Tavern, Fusion, and links to our marketplace where you can BUY/SELL your NFTs directly.

THE TAVERN

The DEFVERSE tavern may be a fantastic place to grab a quick pick me up at the end of the day, but it's also the ONLY place you can buy our new edition NFTs as we release them every 8 weeks. All new cards being thrown into circulation will be hosted here and once they're gone, they're gone.

Investors can list their NFTs for auction or sale directly via the DAPP. This is our recommended way to get your hands on our NFTs after we've sold out.

We have also partnered with a host of secondary markets such as TofuNFT where you can also view and trade our NFTs.

TofuNFT Website: <https://tofunft.com/collection/defverse-characters/items>

FUSION

The fusion system in our BSC smart contract allows you to upgrade your weaker cards to our coveted 4-STAR Legendary cards. Using 3 cards of the same character (a 1-, 2- and 3-STAR) you can FUSE them to create a 4-STAR Legendary card variant of that same character.

Fusion has its bonuses. Higher stats, better game utility, exclusive banners, frames, and icons for use within our games, as well as entry to our **MILLIONAIRE LOTTERY**. Only holders of our Legendary and Founders edition cards are eligible to be entered in this prize draw, where 1 lucky winner will receive 1,000,000 PHP (Philippines PESO), approximately \$20,000 USD, every quarter.

THE MARKETPLACE

DEFVERSE has proudly partnered with multiple secondary marketplaces on the BSC Smart Chain such as TofuNFT, to offer you a choice of stable and trusted platforms to trade all your NFT assets. You can view, buy, sell, and even auction your NFTs here. This is the only way you can fill your card sets once we have sold out. This is necessary to facilitate fusion.

TofuNFT Website: <https://tofunft.com/collection/defverse-characters/items>

GAMES DEVELOPMENT

Games are the heart of DEFVERSE. They are the inspiration for this project and at the forefront of our mind when we decide the direction of the company. They also determine the strategy we employ as we move forward. Both of our founders are games enthusiasts, and we understand that games should not be solely focused on their profit margin or marketing potential. We truly believe that.

The first game we developed for the platform had to be lightweight, simple, yet fun. We wanted to engage our audience and player base with a skill-based game, and finally decided what better way to do that than with a good old arcade classic.

Introducing 'SPACE GUARDIANS'.

SPACE GUARDIANS

Space Guardians is the first title to be released on the DEFVERSE platform and is a vertically scrolling shooter game alike arcade titles such as "Exed-Exes", the classic "1943: The Battle of Midway", and the well-known "Everwing" project.

In Space Guardians you rush to the defence of Neko Sekai, as all races put aside their differences to protect the world as they know it. Little is known of the alien force that threatens your world, but one thing is certain, they're not here to make new friends.

Equipped with a generous arsenal of weapons and ammunition, you take to the skies and battle through the onslaught of these intrepid alien invaders. The goal is to destroy the mysterious commander to ensure the survival of your people.

There are a variety of ships to collect, each with their own factional aesthetics, weapons, and ultimate abilities. Customise your ship and earn that tactical advantage with various upgrades and buffs earned in game and through NFT collections, as well as some awesome auras, unique titles, and icons to show off to other challengers.

Dominate the leader boards and prove your superiority to earn prizes, NFTs, and trophies.

FUTURE GAMES

We aim to release new games on the platform regularly. We have a list of games that we are planning to build including community games, scrolling shooters, arena-based games, and RPGs. This list is NOT exhaustive. We aim to cater for every gamer eventually through our own games and those of our partnered indie developers.

If it can populate a leader board, host a tournament, and offer some sort of competitive feature then it's likely to be considered.

HOW WE PLAN TO CHOOSE THE GAMES WE DEVELOP

DEFVERSE take feedback from our community members and investors seriously. We want to promote communication as we move forward and develop the brand. We will be very open about the games we plan to release in the future, and we'll seek your help when deciding which game to work on next. The voice of our community is important to us. Without you, we would have nothing.

DEFVERSE will regularly host live streams and AMA (ask me anything) events, where we will offer an opportunity to speak with our founders, our development team, and influencers. We want to use these sessions to discuss our plans, our options, and to take suggestions and receive vital feedback.

Using these methods, we can ensure that we're taking the right steps to promote, develop and evolve our brand.

ROADMAP

Below is a list of expected progression for the project. The dates are guidelines and simply act as an aid to keep us on track and fulfil expectations.

Q1 2022

- DVERSE BEP20 Token Deployment
- NFT Contract Deployment
- Marketplace Smart Contract Deployment
- DVERSE Audit (Solid Group)
- Release DVERSE Trailer
- Pitch Deck & White Paper
- DAPP (Decentralized Application) Smart Contract Integration
- 1st Founders Edition Sale

Q2 2022

- Team Expansion
- Secondary Marketplace Partnership (TofuNFT)
- Founders NFT Holders IGO White Listing
- IGO (Initial Game Offering) – May 18 2022 (2nd Founders Edition Sale)
- IDO (Initial Dex Offering) Launch
- Public Listing *PCS (*Pancake Swap*)
- Coingecko and Coinmarketcap Application
- NFT Marketplace
- Team Expansion (stage 2)
- **3rd Founders Edition Sale**
- **3rd Standard Edition** Characters Tavern Sale

Q3 2022

- Space Ship NFT Sale for 'Space Guardians'
- GAME RELEASE: 'Space Guardians'
- **Fusion** Feature **Level 4 Characters Implementation*
- DVERSE Merchandise
- **DISCONTINUE** 2nd Edition Characters
- **3rd Edition** Character Sale – Visit The Tavern

- **LIMITED EDITION** Character Sale

Q4 2022

- **GAME II** Public Announcement and Development
- iOS and Android Companion App
- E-Sports Sponsorship
- **4th Founders Edition** NFT Sale
- **Special Edition** (Festive) NFT Sale
- Team Expansion (stage 3)

Q1 2023

- Decentralized Exchange **DIVERSE SWAP*
- CeX Listing - Centralized Exchange
- DIVERSE IDO and IGO Launchpad
- **LIMITED EDITION** Character Sale

MEET THE FOUNDERS

John K Marcos

I founded Defverse in early 2022 where I recruited a team of like-minded crypto enthusiasts and marketing specialists to help promote my vision of a centralized platform for NFT gaming.

I was introduced to the crypto markets in late 2015 where I began dabbling with minor trades. The potential of the market is what grabbed my attention and I subsequently began teaching myself more about the technology behind it all. I developed an understanding of blockchain technology and later learned of NFTs (Non-Fungible Tokens).

As an entrepreneur, I gained a comprehensive understanding of business and business strategy. I have acquired a variety of skills including marketing, media, leadership, and team management. These skill sets have been vital to my development as an entrepreneur.

The hype of the crypto scene captured my attention and it presented me with a unique opportunity. The ability to create art assets and to support untapped independent creative talents from around the world, really excited me. Suddenly, the NFT market began dominating the headlines. This presented the opportunity to promote individuals and their art using NFTs and blockchain technology. Its continuing growth in popularity led to the birth of DEFVERSE.

I would like to take the opportunity to thank everyone involved in the DEFVERSE project and to extend a warm welcome and thank you to all our investors and community members. I hope you will join us on our journey and continue to support us as we gain momentum and aim to achieve our goals. We aim to be the first NFT Platform to offer hybrid utility for NFTs from various projects and host a library of content from a variety of independent developers.

Gareth James

I was introduced to the DEFVERSE project back in early 2022 when I was approached by our Founder John K. with an opportunity quite like no other. He described the DEFVERSE project to me vividly, and I was almost immediately invested in it. His experience and passion really inspired me, and I made the decision to join the project shortly after.

With a background in games development, business, and marketing I quickly found my role in the DEFVERSE project and the rest they say, is history. The opportunity that the DEFVERSE project has awarded me has already caused me many sleepless nights. I am excited by the challenge and the scale of the project and admire its ambition. The team behind the scenes are not only incredibly experienced but also incredibly humble. Their dedication to the project and its vision is a clear indicator of its guaranteed success.

I'd like to thank everyone at DEFVERSE for their warm welcome and I hope to help guide DEFVERSE towards its future goals.
